

**MALTON SCHOOL
STAFF NOTICE**

Once again colleagues have been told forthrightly that our standards are not those of the halcyon days of grammar schools. I therefore provide the staff with some ammunition in terms of exam statistics.

The 'A' level results are fairly straightforward, 'O' levels less so, especially as some were taken at Malton County Modern and Norton County Modern School. I have taken Malton Grammar's results for four years and assumed that 25% of the two catchments are represented. The figures resultant are, of course, very much approximations but good enough, I think, for us to be able to defend ourselves with confidence, e.g. 32% of our entire year group this year got 5 subjects or more. The Grammar School only admitting in the area of 25% of the year group of two catchment areas, got less than two thirds of them five subjects.

This is not an attempt to knock Malton Grammar School - but certainly we can claim to have continued its standards, if not improved upon them, whilst extending them to a wider range of the school population.
